15/415 SILVER METALZIED BALL CAP F217

A premium cap profile still requires careful review of thread engagement, liner compression, and removal force. For Part 132210, the central question is how the compression-molded closure behaves in the assembled package. Its application range extends to prestige beauty, wellness, pharmaceutical, supplement, and specialty-product packaging. Final approval should follow closure-fit testing, seal evaluation, decoration review, and shipping trials. Good component decisions here can prevent costly changes during scale-up.

SKU: 132210 | **Categories:** Caps, Compression Molded Caps, Non-Dispensing Caps, Plastic Caps |
