8 OZ 70/400 REGULAR WALL OVAL EMERALD PET JAR

For Part 119290, the central question is how the jar packaging format behaves in the assembled package. Sidewall geometry should be judged for label laydown, panel resistance, and how cleanly users can recover product. It may fit briefs involving skin-care creams, body butter, hair treatments, wellness powders, and supplements. Production-intent samples should be filled, sealed, decorated, and distribution-tested before commercialization. Good component decisions here can prevent costly changes during scale-up.
