22/415 TREATMENT PUMP MATTE SILVER/WHITE/CLEAR HOOD

For Part 126790, the central question is how the treatment pump behaves in the assembled package. Verify function over the expected use cycle, including storage orientation and shipping conditions. The 22/415 designation should be verified dimensionally because nominal finish names do not guarantee identical sealing behavior. It may fit briefs involving serums, facial concentrates, scalp care, and targeted treatments. This keeps sourcing decisions tied to measurable package requirements.
