1/2 OZ 43MM SP AMBER THICK WALL ROUND BASE SAN JAR

The commercial value of this jar packaging format depends on disciplined component integration. Sidewall geometry should be judged for label laydown, panel resistance, and how cleanly users can recover product. Commercial approval should reflect filled-package testing under realistic processing and distribution conditions. Its application range extends to skin-care creams, body butter, hair treatments, wellness powders, and supplements. The assembled package should communicate quality before the product is used.
