22/415 TREATMENT PUMP SHINY SILVER/WHITE/CLEAR HOOD

Part 126770 should be judged on technical fit, line performance, and the finished user experience. Prototype with the production formula to evaluate flow, user effort, leakage, and repeatability. The 22/415 designation should be verified dimensionally because nominal finish names do not guarantee identical sealing behavior. Likely development programs include serums, facial concentrates, scalp care, and targeted treatments. The best result will balance line efficiency with intuitive consumer use.
