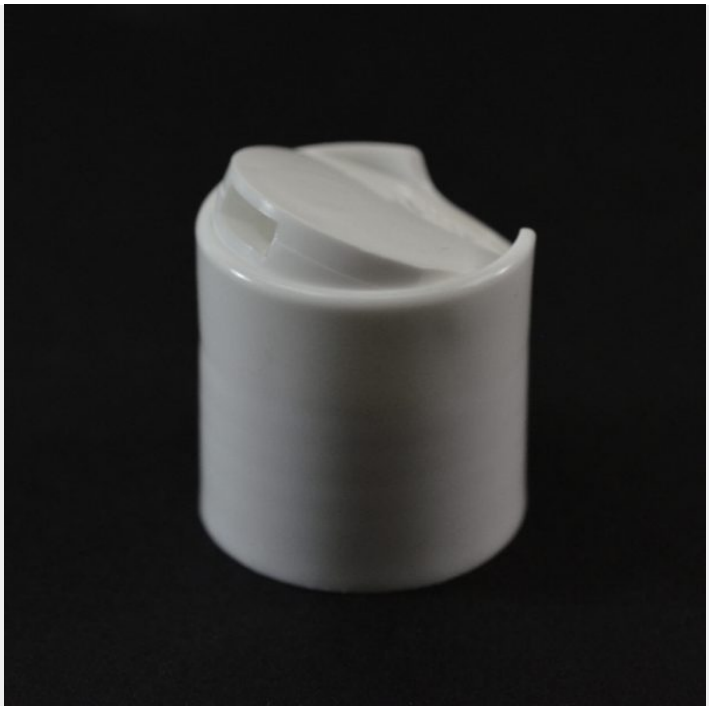
24-410 WHITE SMOOTH DISC CLOSURES



The 24/410 designation should be verified dimensionally because nominal finish names do not guarantee identical sealing behavior. The commercial value of this disc-top dispensing closure depends on disciplined component integration. Its application range extends to shampoo, conditioner, lotion, cleanser, gel, and sun care. Qualification should cover thread engagement, liner compatibility, line application, and expected storage conditions. This is where practical engineering and brand presentation need to agree.
