13/415 NAIL POLISH PP CAP CLARANCE BLACK

It is relevant to nail lacquer, treatment, color cosmetics, and professional salon programs. The 13/415 designation should be verified dimensionally because nominal finish names do not guarantee identical sealing behavior. Product developers comparing nail-polish closure options can use Part 116180, the 13/415 Nail Polish PP Cap Clarance Black, as a focused candidate for qualification. Use filled-package trials to qualify fit, liner compression, leakage, and repeated opening performance.

SKU: 116180 | **Categories:** Nail Polish Caps, Nail Polish Components |
