

13/415 NAIL POLISH PP CAP WHITE FINE RIBBED

This nail-polish closure deserves evaluation within the complete product and container system. Qualification should cover thread engagement, liner compatibility, line application, and expected storage conditions. The 13/415 designation should be verified dimensionally because nominal finish names do not guarantee identical sealing behavior. It may fit briefs involving nail lacquer, treatment, color cosmetics, and professional salon programs. This is where practical engineering and brand presentation need to agree.
