13/415 SILVER METALIZED RING CAP F217

For Part 131920, the central question is how the compression-molded closure behaves in the assembled package. A premium cap profile still requires careful review of thread engagement, liner compression, and removal force. Before release, evaluate application torque, seal integrity, removal force, and distribution performance. It may fit briefs involving prestige beauty, wellness, pharmaceutical, supplement, and specialty-product packaging. Good component decisions here can prevent costly changes during scale-up.

SKU: 131920 | **Categories:** Caps, Compression Molded Caps, Non-Dispensing Caps, Plastic Caps |
