# 15/415 NAIL POLISH PP CAP MARY SMOOTH WHITE

Part 116940 gives development teams a focused basis for testing this nail-polish closure. Its application range extends to nail lacquer, treatment, color cosmetics, and professional salon programs. Cap proportions influence grip and brush control, while stem alignment affects application accuracy and bottle wiping. Confirm thread fit, torque, liner performance, leakage resistance, and opening behavior on production containers. Good component decisions here can prevent costly changes during scale-up.
