15/415 NAIL POLISH PP CAP OCALA SMOOTH WHITE

Packaging engineers can assess Part 116880, the 15/415 Nail Polish PP Cap Ocala Smooth White, against the product, process, and presentation requirements of the program. A decorative cap must still support comfortable rotation, consistent brush alignment, and dependable closure torque. Product teams may consider it for nail lacquer, treatment, color cosmetics, and professional salon programs. Final approval should follow closure-fit testing, seal evaluation, decoration review, and shipping trials.

SKU: 116880 | **Categories:** Nail Polish Caps, Nail Polish Components |
