PRODUCT DESCRIPTION

Part 127510, the 18/415 Fine Mist Sprayer Shiny Silver, addresses both the technical and visual decisions that shape a finished fine-mist sprayer. Nozzle design, formula volatility, viscosity, and surface tension collectively

determine spray character and coverage. Appropriate markets can include facial mist, fragrance, hair care, sun care, and aromatherapy. Verify function over the expected use cycle, including storage orientation and shipping conditions. A thoughtful specification gives operations and brand teams the same target.
