

18/415 GOLD METALIZED RING CAP F217

For a production-intent package, the 18/415 Gold Metalized Ring Cap F217 (Part 132530) offers a defined compression-molded closure rather than a generic starting point. Its application range extends to prestige beauty, wellness, pharmaceutical, supplement, and specialty-product packaging. Phenolic rigidity supports a precise feel, but liner selection and torque remain central to reliable sealing. Prototype with the intended container and product to verify torque range, sealing, and consumer handling.
