FOR DETAILS

Part 126950 gives development teams a focused basis for testing this treatment pump. A prestige actuator must still dispense consistently as viscosity and temperature change through the product's life. Prototype with the production formula to evaluate flow, user effort, leakage, and repeatability. Product teams may consider it for serums, facial concentrates, scalp care, and targeted treatments. Good component decisions here can prevent costly changes during scale-up.

SKU: 126950 | **Categories:** Pumps, Standard Treatment Pumps, Treatment Pumps |

ADDITIONAL INFORMATION
