18/415 WHITE SMOOTH STRAIGHT PP CAP / F217 LINER

Potential uses include cosmetics, personal care, wellness, supplements, household, and specialty products. Nominal finish compatibility is only the first screen; thread profile, land geometry, torque, and liner compression decide sealing. For Part 137630, the central question is how the packaging closure behaves in the assembled package. Confirm thread fit, torque, liner performance, leakage resistance, and opening behavior on production containers. That discipline protects both package performance and the consumer experience.
