20/410 BLACK PHENOLIC ROYAL CAP F217

This compression-molded closure pairs a defined specification with practical manufacturing and consumer-use considerations. The format can serve prestige beauty, wellness, pharmaceutical, supplement, and specialty-product packaging. The 20/410 designation should be verified dimensionally because nominal finish names do not guarantee identical sealing behavior. Prototype with the intended container and product to verify torque range, sealing, and consumer handling. A thoughtful specification gives operations and brand teams the same target.

SKU: 132790 | **Categories:** Caps, Compression Molded Caps, Non-Dispensing Caps, Plastic Caps |
