20/415 FINE MIST SPRAYER SHINY GOLD

SKU: 127770 | **Categories:** Fine Mist Sprayers, Metal Overshell Fine Mist Sprayers, Sprayers |

PRODUCT DESCRIPTION

Specified as Part 127770, the 20/415 Fine Mist Sprayer Shiny Gold brings its key size, finish, material, and color attributes into one development reference. Product teams may consider it for facial mist, fragrance, hair care,

sun care, and aromatherapy. The 20/415 designation should be verified dimensionally because nominal finish names do not guarantee identical sealing behavior. Test the actual formula for output, priming, leakage, actuation feel, and distribution durability.
