20/415 NAIL POLISH CAP WHITE X-TALL SMOOTH CAP

Cap proportions influence grip and brush control, while stem alignment affects application accuracy and bottle wiping. This nail-polish closure deserves evaluation within the complete product and container system. Likely development programs include nail lacquer, treatment, color cosmetics, and professional salon programs. Confirm thread fit, torque, liner performance, leakage resistance, and opening behavior on production containers. The objective is a package that feels intentional at every point of use.
