20/415 TREATMENT PUMP SHINY GOLD/WHITE/CLEAR HOOD

The development value of Part 126730, the 20/415 Treatment Pump Shiny Gold/White/Clear Hood, lies in how its stated attributes guide component pairing and positioning. The 20/415 designation should be verified dimensionally because nominal finish names do not guarantee identical sealing behavior. Approve the system only after formula compatibility, functional cycling, and distribution testing are complete. It may fit briefs involving serums, facial concentrates, scalp care, and targeted treatments.
