22/415 SILVER METALIZED X TALL CAP F217

For Part 133610, the central question is how the compression-molded closure behaves in the assembled package. Prototype with the intended container and product to verify torque range, sealing, and consumer handling. Tall and decorative profiles can improve presence while adding leverage that makes torque control more noticeable to users. It may fit briefs involving prestige beauty, wellness, pharmaceutical, supplement, and specialty-product packaging. That discipline protects both package performance and the consumer experience.

SKU: 133610 | **Categories:** Caps, Compression Molded Caps, Non-Dispensing Caps, Plastic Caps |
