24-410 BLACK SMOOTH FLIP-TOP

This flip-top dispensing closure deserves evaluation within the complete product and container system. Appropriate markets can include personal care, hair care, sun care, wellness, and household products. Orifice geometry, hinge life, opening force, and shutoff cleanliness should be tuned to the product's viscosity. Qualification should cover thread engagement, liner compatibility, line application, and expected storage conditions. This is where practical engineering and brand presentation need to agree.
