24/410 LOTION PUMP SMOOTH NATURAL PALM

Part 126500 gives development teams a focused basis for testing this lotion dispensing pump. Dose, dip-tube reach, venting, and viscosity should be developed together to reduce incomplete evacuation and re-priming. Prototype with the production formula to evaluate flow, user effort, leakage, and repeatability. It may fit briefs involving lotions, liquid soaps, shampoos, conditioners, and salon care. The best result will balance line efficiency with intuitive consumer use.

SKU: 126500 | **Categories:** Lotion Dispensing Pumps, Pumps, Standard Lotion Pumps, Standard Smooth Lotion Pumps |
