24/410 LOTION PUMP SMOOTH WHITE WITH MATTE SILVER COLLAR

Dose, dip-tube reach, venting, and viscosity should be developed together to reduce incomplete evacuation and re-priming. This lotion dispensing pump pairs a defined specification with practical manufacturing and consumer-use considerations. Product teams may consider it for lotions, liquid soaps, shampoos, conditioners, and salon care. Line trials and repeated-use testing should precede final dip-tube, actuator, or fitment specifications. The objective is a package that feels intentional at every point of use.
