

24-410 WHITE SMOOTH DISC CLOSURES

Part 130391, the 24-410 White Smooth Disc Closures, addresses both the technical and visual decisions that shape a finished disc-top dispensing closure. Qualification should cover thread engagement, liner compatibility, line application, and expected storage conditions. Orifice size should match viscosity closely enough to avoid slow dispensing, stringing, or an untidy shutoff. The format can serve shampoo, conditioner, lotion, cleanser, gel, and sun care. This is where practical engineering and brand presentation need to agree.
