24-410 WHITE SMOOTH FLIP-TOP

The 24-410 White Smooth Flip-Top (Part 130841) gives brands a concrete flip-top dispensing closure for balancing usability, manufacturing, and shelf communication. Prototype with the intended container and product to verify torque range, sealing, and consumer handling. The 24/410 designation should be verified dimensionally because nominal finish names do not guarantee identical sealing behavior. Its application range extends to personal care, hair care, sun care, wellness, and household products.
