

24/415 TREATMENT PUMP SMOOTH WHITE

CONTACT US
FOR DETAILS

Likely development programs include serums, facial concentrates, scalp care, and targeted treatments. A prestige actuator must still dispense consistently as viscosity and temperature change through the product's life. The 24/415 Treatment Pump Smooth White, PackagingBuyer Part 127130, gives product teams a clearly specified treatment pump for commercial development. Filled-package trials should confirm dosage, recovery, sealing, component fit, and shipping performance. This keeps sourcing decisions tied to measurable package requirements.
