

30 ML AIRLESS WHITE BOTTLE

Part 140850 gives development teams a focused basis for testing this bottle packaging format. Container stiffness should be considered against squeeze expectations, top load, storage temperature, and distribution stress. Production-intent samples should be filled, sealed, decorated, and distribution-tested before commercialization. Product teams may consider it for cosmetics, personal care, wellness, supplements, household, and specialty products. The best result will balance line efficiency with intuitive consumer use.

SKU: 140850 | **Categories:** [Airless Bottles](#), [Airless Bottles Group VI](#) |
