33/400 LOTION PUMP SMOOTH WHITE

CONTACT US
FOR DETAILS

Its application range extends to lotions, liquid soaps, shampoos, conditioners, and salon care. Dose, dip-tube reach, venting, and viscosity should be developed together to reduce incomplete evacuation and re-priming. The commercial value of this lotion dispensing pump depends on disciplined component integration. Test the actual formula for output, priming, leakage, actuation feel, and distribution durability. A thoughtful specification gives operations and brand teams the same target.
