33/400 RED-YELLOW DISPENSING CAP TWIST OPEN RIBBED PP

For Part 130210, the central question is how the directional dispensing closure behaves in the assembled package. The 33/400 designation should be verified dimensionally because nominal finish names do not guarantee identical sealing behavior. It is relevant to adhesives, hair color, laboratory liquids, craft products, and specialty chemicals. Use filled-package trials to qualify fit, liner compression, leakage, and repeated opening performance. This keeps sourcing decisions tied to measurable package requirements.

SKU: 130210 | **Categories:** Caps, Dispensing Caps, Plastic Caps, Plastic Polytop Caps |
