43MM WHITE FOAMER PUMP T1

For a production-intent package, the 43mm White Foamer Pump T1 (Part 126180) offers a defined foaming dispenser rather than a generic starting point. Line trials and repeated-use testing should precede final dip-tube, actuator, or fitment specifications. Foam quality depends on surfactant system, viscosity, mesh design, and air-to-liquid ratio rather than the pump alone. Its application range extends to facial cleansers, hand wash, baby care, and aromatherapy.
