48/400 SHINY GOLD METAL OVERSHELL ROYAL TALL CAP F217 1.85 X .873

For Part 137340, the central question is how the packaging closure behaves in the assembled package. Confirm thread fit, torque, liner performance, leakage resistance, and opening behavior on production containers. The 48/400 designation should be verified dimensionally because nominal finish names do not guarantee identical sealing behavior. Likely development programs include cosmetics, personal care, wellness, supplements, household, and specialty products. Good component decisions here can prevent costly changes during scale-up.
