# 53/400 ALUMINUM CAP WITH PE FOAM LINER

Nominal finish compatibility is only the first screen; thread profile, land geometry, torque, and liner compression decide sealing. The commercial value of this packaging closure depends on disciplined component integration. Likely development programs include cosmetics, personal care, wellness, supplements, household, and specialty products. Prototype with the intended container and product to verify torque range, sealing, and consumer handling. This is where practical engineering and brand presentation need to agree.

**SKU:** 128970 | **Categories:** Caps, Metal Aluminum Caps, Metal Caps |
