# 53/400 GOLD UNISHELL CAP F217

It is relevant to cosmetics, personal care, wellness, supplements, household, and specialty products. This packaging closure deserves evaluation within the complete product and container system. The 53/400 designation should be verified dimensionally because nominal finish names do not guarantee identical sealing behavior. Qualification should cover thread engagement, liner compatibility, line application, and expected storage conditions. The objective is a package that feels intentional at every point of use.
