FOR DETAILS

A flip-top succeeds when it opens intuitively, dispenses cleanly, and survives the expected number of use cycles. Appropriate markets can include personal care, hair care, sun care, wellness, and household products. This flip-top dispensing closure pairs a defined specification with practical manufacturing and consumer-use considerations. Use filled-package trials to qualify fit, liner compression, leakage, and repeated opening performance. The objective is a package that feels intentional at every point of use.
