# 53MM WHITE PETG SEALING DISC

It may fit briefs involving cosmetics, personal care, supplements, wellness, household, and laboratory packaging. Part 117740 gives development teams a focused basis for testing this package sealing component. A sealing disc is only as reliable as the container land, closure pressure, liner construction, and process window. Prototype with the intended container and product to verify torque range, sealing, and consumer handling. That discipline protects both package performance and the consumer experience.
