58/400 SILVER METALIZED ROYAL CAP F217

Its application range extends to prestige beauty, wellness, pharmaceutical, supplement, and specialty-product packaging. The 58/400 Silver Metalized Royal Cap F217 (Part 136600) gives brands a concrete compression-molded closure for balancing usability, manufacturing, and shelf communication. Tall and decorative profiles can improve presence while adding leverage that makes torque control more noticeable to users. Final approval should follow closure-fit testing, seal evaluation, decoration review, and shipping trials.

SKU: 136600 | **Categories:** Caps, Compression Molded Caps, Non-Dispensing Caps, Plastic Caps |
