

58/400 WHITE UREA DOME CAP F217

This compression-molded closure pairs a defined specification with practical manufacturing and consumer-use considerations. Confirm thread fit, torque, liner performance, leakage resistance, and opening behavior on production containers. The 58/400 designation should be verified dimensionally because nominal finish names do not guarantee identical sealing behavior. Product teams may consider it for prestige beauty, wellness, pharmaceutical, supplement, and specialty-product packaging. The objective is a package that feels intentional at every point of use.
