6 OZ 70/400 DOUBLE WALL ROUND BASE WHITE PP JAR

This jar packaging format pairs a defined specification with practical manufacturing and consumer-use considerations. Production-intent samples should be filled, sealed, decorated, and distribution-tested before commercialization. Jar selection should balance filling access with closure weight, decoration area, and the product's expected use rate. Appropriate markets can include skin-care creams, body butter, hair treatments, wellness powders, and supplements. A thoughtful specification gives operations and brand teams the same target.
