

70/400 WHITE SMOOTH STRAIGHT PP CAP / UNLINED

The format can serve cosmetics, personal care, wellness, supplements, household, and specialty products. Even on the same neck finish, liner thickness and thread engagement can materially change seal performance. For Part 138120, the central question is how the packaging closure behaves in the assembled package. Final approval should follow closure-fit testing, seal evaluation, decoration review, and shipping trials. That discipline protects both package performance and the consumer experience.
