

70 G-450 WHITE WITH BUTTON METAL CAP WITH PLASTISOL LINER

For a production-intent package, the 70 G-450 White with Button Metal Cap with Plastisol Liner (Part 128450) offers a defined packaging closure rather than a generic starting point. Even on the same neck finish, liner thickness and thread engagement can materially change seal performance. Likely development programs include cosmetics, personal care, wellness, supplements, household, and specialty products. Confirm thread fit, torque, liner performance, leakage resistance, and opening behavior on production containers.
