89/400 SHINY GOLD METAL OVERSHELL STRAIGHT SIDED CAP F217 3.40 X .525

For Part 113200, the central question is how the packaging closure behaves in the assembled package. Qualification should cover thread engagement, liner compatibility, line application, and expected storage conditions. Nominal finish compatibility is only the first screen; thread profile, land geometry, torque, and liner compression decide sealing. Likely development programs include cosmetics, personal care, wellness, supplements, household, and specialty products. That discipline protects both package performance and the consumer experience.

SKU: 113200 | **Categories:** Featured Items, Metal Overshell Plastic Caps, New |
