# E5 BLACK PHENOLIC ECLIPSE CAP F217

It is relevant to prestige beauty, wellness, pharmaceutical, supplement, and specialty-product packaging. Phenolic rigidity supports a precise feel, but liner selection and torque remain central to reliable sealing. This compression-molded closure pairs a defined specification with practical manufacturing and consumer-use considerations. Confirm thread fit, torque, liner performance, leakage resistance, and opening behavior on production containers. A thoughtful specification gives operations and brand teams the same target.
